DESCRIPTION

Powerheat type PHT is a constant wattage heating cable manufactured in accordance with the latest International Standards. It can be used for freeze protection or process temperature maintenance of pipework and vessels.

It can be cut-to-length at site, and can replace mineral insulated (MI) cables for applications where the cut-to-length feature, or field fabricated heating cable is preferred.

PHT is approved for use in hazardous areas.

The installation of PHT heating cable is quick and simple, and requires no special skills or tools. Termination and power connection components are all provided in convenient kits.

OPTIONS

PHT...N	Nickel Plated Copper braid for non-hazardous areas, hazardous areas (Zone 1 or 2) or where traced equipment does not provide an effective earth path.
PHT...NF	Fluoropolymer over jacket over nickel plated copper braid provides corrosion protection for braid where chemical solutions or vapours may be present.

MAXIMUM PIPE/WORKPIECE TEMPERATURES

The surface of the heater must not exceed the maximum withstand temperature of its constructional materials or the Temperature Classification (if installed in a hazardous area). This is ensured by limiting the pipe or workpiece temperature to a safe level either by design calculation (a Stabilised Design) or by means of temperature controls.

For worst case conditions, the temperature of steel pipes should be limited to the following levels:-

Catalogue Ref.	Nom Output (W/m)	Area Classification					
		Hazardous ¹			Safe ²		
		T6	T5	T4	T3	T2	T1
PHT..N	10	43	60	100	181	275	275
	30	-	-	25	114	234	234
	50	-	-	-	49	186	186
	70	-	-	-	-	125	125
PHT..NF	10	39	59	106	186	275	275
	30	-	-	20	133	243	243
	50	-	-	-	64	201	201
	70	-	-	-	-	147	147

Pipe temperatures higher than those given above may be accommodated by using Heat Trace Ltd voltage compensating devices. Please call for further details.

Tolerances: Voltage +10%; Resistance +10%; - 0%

Notes

- 1 Surface temperature limits in accordance with current standards.
- 2 Surface temperature limited by materials of construction (withstand temperature).
